

Proposed Boundary Change 1.17.22

Description: Reassign the new housing development (north of Forest Glen Estates, east of 65th St., south of State Ave.), from the Turner Elementary attendance area to the Midland Trail Elementary attendance area. Students would attend Turner Sixth Grade Academy, then Turner Middle School, then Turner High School after completing the elementary grade levels.

Supporting Rationale: Enrollment at Turner Elementary for the 2022-2023 school year is approximately 571 students. The desired building capacity is 567 with a full capacity of 652. Turner Elementary is currently operating close to capacity and enrollment at that building has generally increased over the years.

Midland Trail Elementary has a desired capacity of 546 students. The 2022-2023 enrollment is approximately 510. Midland Trail Elementary can easily house the increased enrollment from the boundary change. Midland Trail also currently serves the neighborhoods south of the new development, so students in geographical proximity would share an elementary school and bus routes are already established.

Implementation timeline: The change is recommended to begin February 1, 2023 prior to the property becoming available for occupancy.
