

Turner High School Proposal

Date: 12/1/2023

Location: Turner High School - 2211 S. 55th Street, Kansas City, KS 66106

Project: Security upgrades

Safe Haven Defense, LLC. is pleased to provide you with this proposal.

Scope:

1. Furnish and install Riot Resistant Security film and exterior graffiti film on selected front entryway doors and windows as well as all other side entry doors and selected side windows surrounding side entryways below a reasonable height of (7') per site walk and take off measurements.
2. Safe Haven Defense will caulk any window that film is installed on per manufacturer's specifications.

Existing Glass Notes: Safe Haven Defense installation crews will remove any vinyl lettering prior to the installation of our security laminate. We do not replace vinyl lettering, but we will take photos of what was there prior.

Pricing:

Riot Control - 842/sqft: \$53,845.75

Caulking - 2,934/LF: \$13,877.82

Total Project Cost: \$67,723.57

Terms: Invoice is due 30 days from completion of the project

Exclusions: Sales Tax is not included. This proposal does not include any adjustments to the windows or frames not discussed in "Scope". Any work not listed in "Scope" and not included in take-off provided. Unforeseen issues with glass or frames. Overtime, Holiday work, Night work and Weekends work. Miscellaneous permits.

Thank you for this opportunity, please do not hesitate to contact me directly with any questions or comments.

Respectfully submitted,

Tim Jennings
Safe Haven Defense, LLC.

_____: Signature

This proposal becomes a binding contract upon signing. Proposal is valid for 120 days

DEFENSE

Disclaimer

Since films are applied with a water-based solution, it is normal for minor bubbling and hazing to occur during installation before curing. This curing period will vary in time depending on the level of exposure to direct sunlight and time. All moisture and water bubbles will disappear with time. SAFE HAVEN DEFENSE will take every necessary action possible to clean all windows prior to the installation of the window film; minor dust particles may appear after the installation of the window film as a result of airborne dust. These particles will dissipate with time and should not be visible when looking through the glass at a distance of 6 feet. (Ask for further details). Security Films/Laminates are a deterrent and may not prevent ultimate entry.
